PROFESSIONAL SUMMARY

Computer engineering undergraduate with strong backend experience. Solid foundation in Data Structures and Algorithms and a keen interest in building production-ready software. Experienced in building and deploying real-world applications, proactive learner with strong problem-solving, communication, and project execution skills, eager to leverage AI tools to improve productivity, efficiency, and software quality.

EDUCATION

- | | |
|--|--------------------------------------|
| • Graduation - Bachelor of Engineering Computer Engineering
Institute of Engineering and Technology, DAVV, Indore, Madhya Pradesh | CGPA: 7.84 (Current)
2023-Present |
| • Senior Secondary (Class XII) – CBSE 2022 | Percentage: 87.33% |
| • Secondary (Class X) – CBSE 2020 | Percentage: 90.6% |
-

EXPERIENCE

- Electronic Arts (EA)– Software Engineering Job Simulation (Forage) | Virtual Experience | 2026 [\[Credential\]](#)
- Proposed and designed a new feature for existing application EA Sports Football, demonstrating understanding of product requirements and user impact.
 - Designed a class diagram, created a header file in C++ with class definitions and helped in feature development
 - Applied object-oriented design principles and analytical thinking to improve code structure and bug fixing.
-

SKILLS AND TOOLS

- **Languages:** C++, JavaScript (ES6), SQL,
 - **Backend:** Node.js, Express.js, REST APIs, Socket.io
 - **Frontend:** React.js, Tailwind CSS, HTML5, CSS3
 - **Database and tools:** MongoDB, MySQL, Git, Postman, Docker
 - **Core concepts:** Data Structures, Algorithms, Object-Oriented Programming
 - **AI and productivity:** Gemini API, AI-based development, AI-assisted analysis, multimodal AI integration
 - **Problem Solving:** Solved 300+ Data Structures and Algorithms problems across multiple coding platforms
-

PROJECTS

CuraDesk– AI and Chat Integrated Healthcare Appointment Booking System [\[GitHub Link\]](#)

- Technologies used - Express.js, MongoDB, React.js, Socket.io, Node.js, Razorpay, JWT
- Built and deployed a healthcare platform for appointment booking, real-time doctor–patient interaction, and AI-based analysis.
- Enabled chat feature between doctors and patients using socket.io.
- Integrated Razorpay payment gateway to support smooth and reliable transaction processing.
- Developed an AI-powered symptom analyser to assist users with preliminary health insights.
- Implemented JWT-based authentication to ensure secure user access and data protection.
- Designed and developed 15+ REST APIs following the MVC architecture.

NeoAI– AI Chatbot Platform Including Multimodal Responses [\[GitHub Link\]](#)

- Technologies used- Express.js, React.js, Node.js, MongoDB, Gemini API, Cloudinary, JWT, ImageKit
 - Built and deployed an AI chatbot platform supporting 3+ modalities text, image generation, and PDF-based Interactions with secured authentication and authorization using JWT-based login system.
 - Designed a credit-based usage system to manage user access and control resource consumption.
 - Integrated external APIs such as ImageKit and Gemini API for image generation and document processing to enable diverse input handling.
 - Structured the application using modular components to ensure scalability and maintainability.
-

CERTIFICATIONS

- | | |
|---|------------------------------|
| • HackerRank Software Engineer Certificate | [Credential] |
| • Forage – Electronic Arts Job Simulation Certificate | [Credential] |
